

PAT3-SET1

1. Write a PHP function to change the following array's all values to upper or lower case.

Sample arrays :

```
$Color = array('A' => 'Blue', 'B' => 'Green', 'c' => 'Red');
```

Expected Output :

Values are in lower case.

```
Array ( [A] => blue [B] => green [c] => red )
```

Values are in upper case.

```
Array ( [A] => BLUE [B] => GREEN [c] => RED )
```

2. Create a text file products.txt with product names and prices (e.g., Laptop,55000, Mouse,500). Write a PHP program to:

- Read the file contents into an array.
- Sort the products based on price (ascending).
- Display the sorted product list in an HTML table with two columns: Product Name and Price.

3. Write a PHP program that uses cookies to count how many times a user has visited your webpage. Display a message showing the visit count.
